

FOR IMMEDIATE RELEASE

Community Invited to Help with a Habitat Restoration Project at Williams Nature Center on June 8, 2025

Mankato, MN – The Jack Loso Chapter of the Izaak Walton League of America invites community members of all ages to get their hands dirty for a good cause at our *Community Habitat Restoration Project* on Sunday, June 8, from 12 to 4 PM at the Williams Nature Center, 54988 MN-68, Mankato, MN 56001.

As part of a larger initiative to protect pollinators and restore native habitats, volunteers will help plant a vibrant habitat filled with Minnesota-native flowers and grasses that support bees, butterflies, birds, and other essential species.

“This is more than a planting event. Our Habitat Restoration Project is a hands-on opportunity for people to reconnect with nature, support local biodiversity, and be part of a lasting conservation effort that will educate and inspire for years to come.”

~ Patti Loso, President, Jack Loso Chapter ~

The new habitat will feature educational signage about pollinators' vital role in our ecosystem. Youth from the chapter's Green Crew, a youth leadership program focused on conservation and environmental stewardship, will maintain the habitat.

What to Bring: Water bottle, gardening gloves, sunscreen, lunch/snacks, and closed-toe shoes.
Volunteer hours are available for students. Families and groups are welcome.
